SSPD2020

Sensor Signal Processing for Defence Conference

International Conference in Sensor Signal Processing for Defence: from Sensor to Decision

The Sensor Signal Processing for Defence Conference is organised by the University Defence Research Collaboration (UDRC) in Signal Processing. SSPD 2020 aims to bring together researchers from academia, industry and government organisations interested in Signal Processing for Defence.

SSPD 2020 will now be held as a virtual conference

Papers are solicited from the following areas:

- Array Signal Processing Image Processing
- Radar, Sonar and Acoustic
- Multimodal Signal Processing
- Multi-Target Tracking
- Signal Acquisition and Sensor Management
- Multiple-Input and Multiple-Output (MIMO)
- Information/Data Analysis
- Data Fusion
- Source Separation
- Anomaly Detection
- Distributed Signal Processing
- Low Size Weight & Power Solutions
- Target Detection and Identification
- Electro - Optic Sensing
- Deep Learning, Machine Learning

SEPTEMBER 15 - 16, 2020
